

EXECUTIVE RULING: IQ RETINALOCK

The IQ Retinalock is included in the bow sight and is legal in IFAA tournaments.

However, this device assists the archer in consistency of anchor point and eye alignment, which contradicts Rule 5d of the BU shooting style rules.

The IQ Retinalock therefore is only legal in the Unlimited Freestyle (FU) and the Limited Freestyle (FS) shooting styles. Archers who use this equipment will automatically be registered in either of these two styles, unless this equipment is removed before equipment inspection.
