

1. **Registration**
 - a. **Do not leave home if you feel unwell, stay home and seek information from NHS111 on-line.**
 - b. **Currently groups of 30 people can meet outdoors (socially distanced) so any archery event would need to be less than 30 people or must commence with a staggered start approach.**
 - c. All archers attending a classification shoot must take in their quiver a bottle of hand sanitiser (70% alcohol or more) and a face covering. This should be checked as part of bow inspection.
 - d. Classification cards shall be shown on registration.
 - e. The shoot fee should be advertised prior to the event and archers should attend with the correct money or should have paid on-line prior to the event.
 - f. Once a group have arrived, they should be given the score cards told of any health and safety issues and sent to target one to start. Households should remain together, if possible, even if the group is larger than would normally be accepted.
2. **Bow Inspection**
 - a. This will occur with a suitably trained EFAA person, who will be wearing PPE and using a cleanable table to rest the equipment on. Our original method of bow inspection may now resume.
3. **Shooting**
 - a. If the archers are from different households then only one archer may shoot at a time unless 2m can be maintained and the rest of the group must stand such that they remain socially distant (2m apart).
 - b. The social distancing shall remain throughout the walk to each target and whilst scoring the arrows.
 - c. The instruction has always been to brace the target whilst pulling arrows, this should not be done with the hand but with the arm, hip or knee to ensure that the hands remain clean.
4. **Administration**
 - a. On completion of the course and addition of the score cards the classification cards will be completed by the shoot organiser.
 - b. The shoot certificate should then be completed and sent to the Classifications Officer with any record/incentive claims and score cards – suitably labelled.
